(MORE ON  
OTHER SIDE)

SEVASTOPOL (3Sep04) URGENT PRIORITY!! ENCODE FOR IMMEDIATE TRANSMISSION. "Reports from 33d Intelligence Group show massive buildup of German forces in area of Breslau. Additional evidence from 'Stefan' is that Krupp works have lately made new order of armaments and large stocks of 'O' gauge railway cars. It is noted that 'O' gauge track is not repeat not used in German rail network but is gauge from border of Grand Duchy of Poland to Warsaw. You are to take immediate defensive measures in your area. Suggest that as Tsar is apparently engaged with Germany as well you coordinate frontiers. This is not authorization for political talks, and communication with Russian forces to be at lowest and most informal practical level. Popogord."

LARRY - This means you are now a  
COSTA player, thus nullifying our trade.  
Hereinafter we trade for SACUENNY, OK!

## REST OF PRESS

ST.PETERSBURG: Situational analysis as of 2400 hrs, 5Sep04:

The German movements appear to be concentrated in the environs of Schleswig. As yet there is no evidence of English involvement in these preparations but a close radio check of their communication is being maintained. Reports from the rebel-held areas indicate increasing concern should be exploited but cooperation given in order not to bring any of the Sevastopolitan forces further north where additional provinces might be threatened.

GREECE: HOW ITALY WILL LOSE THE WHOLE SMITHOUSE

They will bringo and they will whine,  
They will crow with (half)-wit sublime,  
And after words spent in this time line,  
They will, whimpering, resign.

BACKWATER, Turkey: Information which may influence the whole herstory of the 1971 Bass Ackwards game today came to light. A small vial of platypus venom has been found in this community of retired snatch-stuffers. The government has assured the yellow scum, as the armed forces are called, that some use will be found for the material.

A little more left over will await next issue.
